SUMMARY

Information Science and Engineering graduate (2026, 7.87 CGPA) with hands-on experience in Python, SQL, machine learning, and data analysis. Built 4 end-to-end projects, including ML models on datasets of up to 40,000+ records, a Gemini-powered AI web application, and a Flask full-stack system. Data Science intern skilled in data cleaning, feature engineering, NLP (TF-IDF), and Scikit-learn. Seeking entry-level Data Analyst, Data Scientist, or Machine Learning Engineer roles.

EXPERIENCE

Prinston Smart Engineers | Data Science Intern — Bengaluru, India | Jan 2026 – May 2026

- **Skills Covered:** Data Cleaning, Preprocessing, Feature Engineering, Data Analysis, NLP (TF-IDF), Scikit-learn; collaborated on data-driven projects to support decision-making.
- **Machine Learning:** Built and evaluated ML models using Scikit-learn; improved model performance through feature optimization.

DataMites | AI Engineer Program (Ongoing) — Bengaluru, India | Ongoing

- **Program Progress:** Pursuing a 10-month, 400+ hour AI Engineer program (IABAC and NASSCOM-aligned) with live training and capstone projects.
- **Skills Covered:** Python, Statistics, Machine Learning, Feature Engineering, SQL and MongoDB, Git, and Business Intelligence tools.
- **Upcoming Focus:** Deep Learning, Computer Vision, NLP, Generative AI, and Agentic AI.

EDUCATION

Rao Bahadur Y. Mahabaleswarappa Engineering College — Ballari, Karnataka, India | Nov 2022 – Aug 2026

Bachelor of Engineering in Information Science and Engineering; GPA: 7.87

PROJECTS

Society Voice | Full-Stack Web Application GitHub Repository — Nov 2025 – Jan 2026

- Developed a full-stack society management system (**Flask**, **SQLite**, HTML, CSS, JavaScript) in a team of 4, with **CRUD** for complaints, polls, alerts, and maintenance payments.
- Built **30 REST API endpoints** and a 10+ table relational **SQLite** database.
- Implemented **role-based access control** (Resident, Worker, Admin), admin-approved registration, a complaint lifecycle (Open → In-Progress → Resolved), image uploads, and payment verification.

Football Players Salary Prediction | Machine Learning GitHub Repository — May 2026

- Built an end-to-end **Random Forest regression** model on **40,791** player records (16 features) to predict football player salaries, achieving an **R^2 score of 0.87** on a 20% test set.
- Performed **data cleaning** (currency and text normalization), **label encoding** of categorical features, and **EDA** using Seaborn and Matplotlib (correlation heatmap, boxplots, pairplots).
- Deployed an interactive **Gradio** interface for real-time salary prediction.

Video Games Sales Prediction | Machine Learning GitHub Repository — Apr 2026

- Built an end-to-end **ML pipeline** on **16,598** video game records (11 features); handled 271 missing values using **median imputation** and **label-encoded** categorical features.
- Compared **Linear Regression**, **KNN**, and **Random Forest** models; the Random Forest classifier achieved **99.4% accuracy** on the test set.
- Deployed the model with **Gradio** for real-time predictions.

Plant Disease Detector | Generative AI Web Application GitHub Repository — Nov 2025 – Jan 2026

- Built a **Streamlit** app integrating **Google Gemini 2.5 Flash** (multimodal LLM) to diagnose plant diseases from leaf images via file upload or live camera capture.
- Engineered a structured **prompt** that returns plant species, disease, cause type (fungal, bacterial, viral, pest, deficiency), symptom analysis (chlorosis, necrosis), and treatment and prevention plans.
- Secured API keys using **Streamlit secrets** and added input validation and error handling.

TECHNICAL SKILLS

- **Programming & Query Languages:** Python, SQL, Java
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel, Data Visualization, Statistical Analysis
- **Machine Learning:** Scikit-learn, Regression, Classification, Model Evaluation, R^2 Score, Label Encoding, Linear Regression, Logistic Regression, Decision Tree, Random Forest, KNN, SVM, Naive Bayes, K-Means Clustering, NLP (TF-IDF)
- **Deep Learning & Computer Vision:** TensorFlow, Convolutional Neural Networks (CNN), OpenCV
- **Data Preprocessing:** Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering
- **Generative AI:** Google Gemini API, Prompt Engineering, Multimodal LLM, Streamlit
- **Databases:** MySQL, PostgreSQL, SQLite, SQL, NoSQL
- **Web Development:** Flask, HTML5, CSS3, JavaScript, REST APIs, CRUD Operations, Role-Based Access Control (RBAC)
- **Deployment & Tools:** Git, GitHub, Gradio, Vercel, Render, VS Code, PyCharm

CERTIFICATIONS

- **Data Science Internship** | Prinston Smart Engineers | Internship ID: PSE19352 Certificate
- **Full-Stack Web Development Bootcamp** | Udemy Certificate
